PRESS RELEASE

Sun-Gard Introduces GP MAX “Value Series” Automotive Window Film

St. Petersburg, FL, December 2, 2008: Given the tough economic times, it is clear to Solamatrix, Inc. that some kind of relief is needed for window film dealers who are seeing fewer installations per day and having a hard time making enough money to sustain their business. According to Business Development manager, Bryan Young, “We have heard the message from our dealers loud and clear and have created a new automotive film value series to address the market reality that our customers are facing.”

While offering a less expensive film is essential, it is even more important that it be a durable film that looks good and installs well. The result is GP Max™, a good quality window film at an affordable price. The company has introduced this high-performance window film at prices around 30-50% lower than many conventional premium films. The latest addition to the Sun-Gard® film line, GP Max is a substantial (1.5 mil) film with an attractive neutral color, excellent heat shrinking properties and backed by a factory warranty. For further details, contact Sun-Gard at (888) 887-2022.
